July 2002

THE DATA SOURCE HANDBOOK

PURPOSE

Over the 20 years that the State Census Data Center has been in existence, it has developed a network of data providers in federal and State agencies. The Data Source Handbook is an effort to share this list of data providers with other data users.

The Handbook is by no means an exhaustive list nor should the inclusion of a source be considered an endorsement. The individual data user should examine any data received to determine its relevance to the research being conducted.

This compilation was prepared by Cyndee Singer. Updates, revisions, corrections, and comments should be directed to:
